

# Price list Octalarm-IP

The Octalarm-IP is a versatile alarm dialler with well-arranged operation. Alarms are sent via voice, SMS, pager or email message to the set recipient. For extra security, the dialler can be delivered redundantly or alarms are sent to a manned control room.

We would like to point out that the lifespan of this dialler is limited due to changes in the telecom networks. We advise you to consider the purchase of the successor, the Octalarm-Touch.
