

How to replace the battery

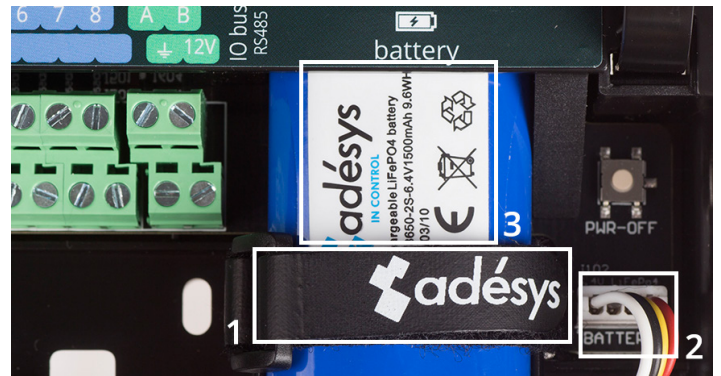

Octalarm-TOUCH | Octalarm-TOUCH PRO | ARA - PRO NEXT

The rechargeable LiFePO4 battery (LFR18650-2S | 6.4V/1500mAh | 9.6WH) delivered with the Octalarm alarm dialler has a life span of 2 years. The detector indicates when the battery needs to be replaced. You can replace the battery yourself very easily.

Step by step explanation

- Raise the housing cover until you hear a click.
- Detach the Velcro fastener (1) and then the battery connector (2) and remove the old battery.
- Place the new battery on the battery flat and secure it tightly with Velcro (1)
- Then connect the connector (2).

! Replacing the battery with an incorrect type may cause damage to the device and the battery.

Battery compartment

1	Velcro fastener
2	Battery connector location
3	Battery label

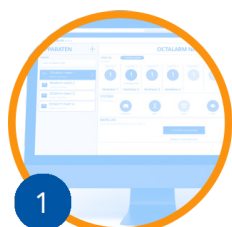

Do you already make the best use of your dialler?

Since the launch of the Octalarm-Touch in April 2019, many **free** features have been added:

- ✓ app alerting
- ✓ remote setup and management (via app and portal)
- ✓ software ready to extend to 16 and 24 alarm inputs by purchase of EM-8001
- ✓ separate system faults
- ✓ an audit trail in the logbook
- ✓ link with ARA5 / ARA-Pro Next

Make sure your Octalarm alarm dialler is connected to the internet. That way you always receive free software updates and you make optimal use of your device.

How to optimally use your dialler

- 1 Create a free account at **portal.octalarm.com**
- ✓ Remote setup and management
 - ✓ View current status alarms
